SUMMARY

Computer Programming graduate with a strong foundation in software development, object-oriented programming, and problem-solving. Proficient in JavaScript, Python, and C++, with hands-on experience through academic and personal projects. Brings strong analytical, troubleshooting, and communication skills developed in a fast-paced customer support environment. Seeking an entry-level Software Developer or Junior Programmer role to build reliable and user-focused software solutions.

WORK EXPERIENCE

iQOR (Walmart Account) - Aug 2025 - July 2026

Customer Service Representative | Chat Support

- Delivered chat-based customer support for Walmart's e-commerce platform, assisting both customers and third-party sellers with order, account, payment, shipping, return, and marketplace-related concerns.
- Investigated and resolved customer issues by analyzing account information, transaction records, and internal systems to determine appropriate solutions.
- Documented customer interactions thoroughly and maintained accurate case records in accordance with company policies and procedures.
- Collaborated with internal departments to escalate complex issues and ensure timely resolution.
- Applied strong analytical thinking, problem-solving, and communication skills to deliver effective customer support and improve the overall customer experience.

FY International LLC | 2022 - 2025

E-Commerce VA for Walmart, Amazon, and Newegg

- Conducted product research to identify market trends and profitable items.
- Created and optimized product listings, including descriptions, titles, and images.
- Prepared & ensure the product photos are optimized.
