Ms. Roche Casipong
HR Recruitment
Jairosoft, Inc.
Holy Trinity Avenue, Holy Trinity Village,
Cabantian, Davao City, 8000

Dear Ms. Casipong,

I am writing to express my interest in an internship opportunity at Jairosoft. As a third-year Computer Science student at the University of Mindanao, I have developed a solid foundation in frontend and backend development, and UI/UX design. My passion for transforming ideas into interactive web applications and creating enjoyable user experiences drives me to seek opportunities where I can apply and further hone my skills. I believe my technical expertise, creative vision, and eagerness to learn make me an ideal candidate for this internship.

Through my coursework and various projects, I've gained a lot of experience with different programming languages. I've learned how to build web applications and create dynamic user interfaces, and I've worked with databases like MySQL and Firebase. I also have hands-on experience with mobile development projects using Flutter, which has given me a good understanding of cross-platform app development. Additionally, I've developed my design skills using Figma, allowing me to create user-friendly and visually appealing interfaces.

I am really inspired by Jairosoft's creativity and dedication to delivering cutting-edge web solutions. I believe my experiences with my design skills, along with my enthusiasm for web applications, would allow me to contribute effectively to your projects. Moreover, I am very willing to work hard and eager to learn even more by being part of your team. I am confident that the hands-on experience I would receive at Jairosoft would significantly enhance my skills and knowledge in both web development and UI/UX design.

I am excited about the opportunity to bring my background in development to help Jairosoft continue to innovate and succeed. Thank you for considering my application. I look forward to the possibility of contributing to your team and growing both professionally and personally through this internship.

Sincerely,

James Paul S. Balagat
